Sponsors.....	I
Steering Committee.....	XX
Advisory Committee.....	XX
Message of Greeting / Grußwort.....	XXII

Plenary Sessions

Lifelong Learning for Meaning.....	1
<i>Prof. Roberto Carneiro, former Portuguese Minister of Education & Dean of the Institute for Distance Learning at the Portuguese Catholic University, Portugal</i>	
E-Learning and Knowledge Management: How to Reconcile Coherence and Variety of Solutions, Efficiency and Reactivity?.....	2
<i>Eric de Dreuzy, Director eLearning, Air France, France</i>	
Transforming Learning and Life Chances: What's the Critical Path?.....	3
<i>Brian Durrant, Chief Executive, London Grid for Learning Trust, UK</i>	
Competence to the Business - How Can We Learn More, Faster and Cheaper?.....	4
<i>Staffan Ivarsson, Deputy Director, Human Resources, Swedbank, Sweden</i>	
A Quantum Leap in Lifelong Learning in The Netherlands; the Need for a National Open and Flexible Lifelong Learners' Infrastructure.....	6
<i>Ben J.P. Janssen, Secretary to the Dutch National Initiative 'Long Live Learning!', & Prof. Fred Mulder, Open University of the Netherlands, The Netherlands</i>	
The Cult of the Amateur: How Today's Internet is Killing Truth.....	8
<i>Andrew Keen, USA</i>	
Knowledge 2.0? Social Networks and the Global Sourcing of Talent.....	8
<i>Bruno Lanvin, Executive Director, INSEAD/eLab, France</i>	
The Collaborative Working Environment: Next Generation Learning Platform, Including Web 2.0.....	9
<i>Roger Larsen, Founder and Managing Director, Fronter, Norway</i>	
The 'Hole in the Wall' Experiments: Self-Organising Systems in Primary Education.....	11
<i>Prof. Sugata Mitra, Newcastle University, UK & Chief Scientist Emeritus, NIIT Ltd., India</i>	
Opening Keynote Speech.....	12
<i>Hon. Elizabeth Ohene, Minister of State, Ministry of Education, Science & Sports, Ghana</i>	

E-Learning in the Corporate and Company Context

Meeting the Needs, A Company is Preparing for Virtual Teamwork.....	15
<i>Dr. Marion Bruhn-Suhr, University of Hamburg, Germany</i>	
Large Scale E-Learning Implementation in a Retail Environment at real,- SB Warenhaus GmbH.....	17
<i>Olaf Bursian, real,- SB Warenhaus GmbH, Member of MetroGroup, Germany</i>	
E-Learning as a Solution for Mine Safety Training in South Africa.....	20
<i>Ronel Callaghan & Etienne Van Wyk, Tshwane University of Technology, South Africa</i>	
It's Not About the Technology.....	23
<i>Jay Cross, Internet Time Group, USA</i>	
A New Learning Service Concept for Thales Netherlands.....	25
<i>Dr. Pieter de Vries, Delft University of Technology & Heinz Strotmann, Thales Nederland B.V., The Netherlands</i>	
Online SME Workplace Training Solutions for Outsourced Production Processes.....	29
<i>Erik Engh, Quality Management Software, Norway, Hariklia Tsalapatas, University of Thessaly, Greece & John B. Stav, Sør-Trøndelag University College, Norway</i>	
www.foraus.de - BIBB's Service for the Promotion of Training Personnel.....	32
<i>Michael Härtel, BIBB: Federal Institute for Vocational Education and Training, Germany</i>	
Content Just to Offer Content? - Methods of Engagement and Service Delivery to SMEs.....	35
<i>Vernon Jones, South Yorkshire e-Learning Programme, UK</i>	
The Skills of Generation Y Used for SMME Personnel Training.....	36
<i>Petri Lounaskorpi, Information Technology Research Institute (ITRI), University of Jyväskylä, Finland</i>	
Enhancing E-Learning and Developing a Continuing Training System for Trainers: The Case of Italy.....	38
<i>Claudia Montedoro & Saverio Pescuma, ISFOL Istituto per la Formazione dei Lavoratori, Italy</i>	
Introducing Innovation in Andalusian Small and Medium Enterprises Through E-Learning.....	42
<i>Dr. Ainhoa Otamendi Herrera, Technological Network of Andalusia (RETA), Spain</i>	
E-Learning as an Elementary Component for Successfully Handling Situations where Someone Runs Amok.....	45
<i>Uwe Seidel, Ministry of the Interior Baden-Württemberg - State Police Headquarters, Germany</i>	

Training Hits the Road - Supporting European Automotive Technicians with MYCAREVENT.....	49
<i>Dr. Wolfram Sittig, ESG Elektroniksystem- und Logistik GmbH, Germany</i>	
E-Learning by Doing: Designing Effective Workplace Learning.....	52
<i>Dr. Sergio Vasquez-Bronfman, European School of Management, France & CV&A Consulting, Spain</i>	

'Learning Futures' in Higher Education

Using Mashups and Web 2.0 Applications to Create Personal Learning Environments.....	54
<i>Ahmet Emre Açar, CeDiS, Free University Berlin, Germany</i>	
CARPE DIEM: Seizing Each Day for E-Learning Design.....	55
<i>Dr. Alejandro Armellini, University of Leicester, UK</i>	
Improving the Higher Education Environment with Knowledge Management and ICT: The Bangkok University Case.....	56
<i>Prof. Aurilla A. Arntzen, Hedmark University College, Norway & Bangkok University, Thailand; Tone Vold, Hedmark University College, Norway & Dr. Lugkana Voransachai, Bangkok University, Thailand</i>	
Rethinking University Learning Environments and Methods.....	61
<i>Prof. Bodil Ask, University of Agder, UiA & Harald Haugen, Stord/Haugesund University College, Norway</i>	
Measuring Success in E-Learning - A Multi-Dimensional Approach.....	63
<i>Malcolm Bell & Stephen Farrier, Northumbria University, UK</i>	
International Design Business Management Online. Environmental Law and Policy Analysis: Business Opportunities.....	64
<i>Henrik Bergh, Katja Karevaara, Ari Ekroos & Matias Warsta, Helsinki University of Technology, Finland</i>	
The Important Role of ePortfolios in Switzerland.....	70
<i>Prof. Willi Bernhard, Swiss Distance University of Applied Sciences, Switzerland</i>	
Elaboration of Multimedia Teaching Materials at Riga Technical University.....	70
<i>Dr. Juris Blums, Riga Technical University, Latvia</i>	
The Role of a Teacher in Higher Education in Face-to-Face in Blended Learning.....	71
<i>Prof. Hans Boon, University of Pretoria, South Africa</i>	
Moodle, the Open Source Virtual Learning Environment: Is the Future Really Free?.....	72
<i>Eric Clarke, Royal College of Surgeons in Ireland, Ireland</i>	
Scaling Up and Skilling Up: Using E-Learning Workshops for Staff Development and Scalability.....	72
<i>Claire Doody, Royal College of Surgeons in Ireland, Ireland</i>	

Full Scale Implementation of a Blended Educational Model at Al Ahliyya Amman University.....	73
<i>Carlos A. Garcia, Universal Knowledge Solutions, United Arab Emirates</i>	
E-Learning as a Mediator of Language Skills and Didactics in a German-Kyrgyz Study Programme.....	74
<i>Prof. Gudrun Görlitz & Stefan Müller, TFH Berlin - University of Applied Sciences, Germany; Asyl Madraimova, Kyrgyz Technical University Bishkek, Kyrgyzstan</i>	
'The Knowledge Worker in SHAPE' Using Sharepoint as a Working and Learning Environment.....	75
<i>Nico J. Juist, INHOLLAND University, The Netherlands</i>	
Remote Teaching Laboratories in Chemistry.....	77
<i>Prof. Dietmar Kennepohl, Athabasca University, Canada</i>	
Services Approach in Dutch Higher Education - Expectations, Opportunities and Current Activities.....	78
<i>Eric Kluijfhout & Ronald Ham, SURFfoundation, The Netherlands</i>	
E-Learning Provision as a Community Demand in Universities: UPNA (A Case Study).....	79
<i>Dr. Miguel A. G. Laso, Pablo San Roman, Gorka Larralde, Xabier Cabrerizo & David Benito, Centre for Innovative Higher Education at UPNA, Spain</i>	
How to Improve the Virtual Campus? Lessons Learned from Faculty Members and TAs' Feedback.....	82
<i>Béatrice Lecomte, University of Liège, Belgium</i>	
Overcoming the Challenges of Learning Transformation in Further and Higher Education.....	84
<i>Anne McNeill, Dumfries and Galloway College, UK</i>	
Current Vistas and Realities of E-Learning in Architectural Education in Nigeria.....	87
<i>Prof. Olu Ola Ogunsote, Dr. Emmanuel L. Adebayo & Dr. Bogda Prucnal-Ogunsote, Federal University of Technology, Nigeria</i>	
Extending and Supporting Physical Student Mobility Through Virtual Mobility: The VM-Base Experience.....	90
<i>Ilse Op de Beeck, Prof. Wim Van Petegem & Katrin Bijmens, EuroPACE ivzw, Belgium</i>	
Developing E-Learning - Reforming Ways of International Cooperation in Education.....	93
<i>Prof. Martti Raevaara, University of Art and Design Helsinki, Finland</i>	
Learning from the Future.....	96
<i>Prof. Gilly Salmon, University of Leicester, UK</i>	
How to Mobilise Your Faculty Workforce.....	99
<i>Jan Snijders & Eky Fioole, Avans University of Applied Science, The Netherlands</i>	

Viable Large Scale Online-Learning in Higher Education: The oncampus Case.....	100
<i>Farina Steinert & Prof. Rolf Granow, oncampus, Lübeck University of Applied Sciences, Germany</i>	
Towards a Future VLE for an Open and Distance Learning Institution.....	102
<i>Dr. Steven Verjans, Open University of the Netherlands, The Netherlands</i>	
Let Me Learn®: A System for Teaching ICT Skills to University Teachers.....	104
<i>Laura Patricia Villamizar Carrillo, Rovira and Virgili University, Spain & University of Pamplona, Colombia; Angel Pio Gonzalez Soto, Rovira and Virgili University, Spain</i>	
Help Me! Online Learner Support Through the Self-Organised Allocation of Peer Tutors.....	105
<i>Dr. Wim Westera & Leo Wagemans, Open University of the Netherlands, The Netherlands</i>	

Classroom Learning and ICT

European Pedagogical ICT Licence in Italy: An Educational Programme Aimed at Formal and Informal E-Learning.....	108
<i>Prof. Giovanni Adorni & Angela Maria Sugliano, University of Genoa, Italy</i>	
Using Interactive Computer Software (ICS) to Improve the Learning of Space Science and Mathematics in Primary School Education.....	110
<i>Theodora Aregbesola, Obafemi Awolowo University, Nigeria</i>	
Labelling Digital Learning Materials so that Teachers Can Find and Use Them.....	113
<i>Dr. Wim de Boer, SLO (Dutch Institute for Curriculum Development), The Netherlands</i>	
Developing Pedagogical ICT Competencies and Activities in the Teacher Training Programme.....	114
<i>Petra Fischer & Willem Hoekstra, VU University Amsterdam, The Netherlands</i>	
Dutch Integration Exams - Official Integration of Immigrants in Dutch Society.....	116
<i>Janneke Helsloot, Andriessen en Partners BV, The Netherlands</i>	
Taking the Lead from Users.....	118
<i>Nick Jeans, South Yorkshire e-Learning Programme, UK</i>	
Ways to Support Reflective Thinking in Educational Games.....	119
<i>Dr. Harri Ketamo & Marko Suominen, Tampere University of Technology, Finland</i>	
Ways to Support Reflective Thinking in Educational Games: Illusion of Intelligence Approach.....	123
<i>Dr. Kristian Juha Mikael Kiili, Tampere University of Technology, Finland</i>	

ICT in European Schools: Quantitative and Qualitative Observations.....	125
<i>Prof. Kurt Kohn, University of Tübingen, Germany</i>	
Developing a Synthesis of Technology, Tools and Classroom Practice to Create an Effective Online Pedagogy.....	127
<i>Gill Potter, Oxford Brookes University & Matthias Scheja, Ealing City Learning Centre, UK</i>	
The Consolarium: Making Games Based Learning Happen in Scottish Schools.....	127
<i>Derek P. Robertson, Learning and Teaching Scotland, UK</i>	
Connecting the Online Study Circle and the Online Learning Community in Supporting Continuous Teacher Development.....	130
<i>Ingemar Svensson, Swedish Agency for Flexible Learning, Sweden</i>	
Radio Broadcasting as a Teaching Instrument in Rural Schools.....	132
<i>Prof. Costas Tsolakidis & George Syggelakis, University of Aegean, Greece</i>	
Modelling & Collaboration Activities for Schools Mentored Through Teacher Training.....	135
<i>Dr. Márta Turcsányi-Szabó, Eötvös Loránd University, Hungary</i>	
'OK, So We Got it Wrong!' How the Lessons from a Disaster Led to Success.....	139
<i>Andrew Watt, The City of Edinburgh Council Education Department, UK</i>	

Public and Professional E-Learning

Student E-Communities in a UK Medical School: Facilitating Peer-Interaction and Student-Led Support.....	142
<i>Deborah Biggerstaff, Warwick Medical School, UK</i>	
Mainstreaming E-Learning to Support Environmental Assessment and Early Warning.....	143
<i>Gerard Cunningham & Maria Eugenia Arreola, United Nations Environment Programme, Kenya; Arndt Bubenzer, common sense - eLearning & training consultants GmbH, Austria</i>	
Kadaster Digital Perspective: Using E-Learning to Bridge the Knowledge Gap.....	146
<i>Danny de Vos, Kadaster & Dr. Göran Kattenberg, Eedo Knowledgeware, The Netherlands</i>	
E-Learning in the United Nations System.....	148
<i>Fred de Vries, UNHCR, Switzerland</i>	
Virtual PBL Approach to Medical Staff Training: The MEDITOP Project.....	150
<i>Federica Funghi, Ilaria Mascitti & Emilia Primari, FOR.COM. Interuniversity Consortium, Italy</i>	

Online Problem-Based Learning Exercises in Postgraduate Medical Education: A Content Analysis of Reflection Points.....	153
<i>Dr. Maria Gonzalez, Department of Dermatology, Cardiff University, UK</i>	
Investing in a New Culture of Learning in Public Administration.....	154
<i>Teresa Salis Gomes, Instituto Nacional de Administração (INA), Portugal</i>	
Scaling Up Telemedicine Through the Global Development Learning Network.....	156
<i>David Gray, World Bank, Latin America and Caribbean Region, USA</i>	
RVC 4 LIFE: Lifelong E-Learning for Veterinary Graduates.....	157
<i>Nick Short, Royal Veterinary College, University of London, UK</i>	
E-Learning for Sustainable Water Management.....	158
<i>Christian Stracke, University of Duisburg-Essen, Germany</i>	
NeuroBlend: A European Competence Based Blended Learning Framework for Lifelong Learning of Neuroscience Nurses.....	159
<i>Nicolai van der Woert, University Medical Centre St. Radboud, The Netherlands</i>	

Lifelong and Informal Learning

EAGLE: Lifelong Learning Between the Generations: State-of-the-Art, Potentials and Future Challenges.....	163
<i>Thomas Fischer, FIM-NewLearning, University of Erlangen-Nürnberg, Germany</i>	
Support for ICT for Learning from the EU's Lifelong Learning Programme.....	167
<i>Brian Holmes, Executive Agency for Education, Audiovisual and Culture, Belgium</i>	
Digital Terrestrial TV and TV Learning Games in Support of Vocational Training and Lifelong Learning.....	171
<i>Andrea Lorenzon, Giunti Labs, Italy</i>	
A Peer Comparison Approach to the Planning of (In-)Formal Training and Development Activities.....	172
<i>Dr. Christoph Meier, University of St. Gallen, Switzerland</i>	

Designing, Teaching and Learning with Digital Media and Tools

Understanding Arab Learners' Characteristics and Needs.....	176
<i>Prof. Sahar Mohamed Talaat Abdel Bary, Mona Younis, Dina Oriebly & Amr El Mershawy, Media International, Islamonline.net, Egypt</i>	
Metadata and Standardization of Learning Resources for Pedagogical Tracking.....	179
<i>Michel Arnaud, University of Paris X Nanterre, France</i>	

Alliance for Building Bridges to Digital Content.....	180
<i>Emma Beer, The Strategic Content Alliance, UK</i>	
Design, Production and Implementation of Multimedia Simulations in a Leading Business School.....	180
<i>Mathew James Constantine, Instituto de Empresa Business School, Spain</i>	
Large-Scale Implementation of a VLE: An Institutional Case Study of Blackboard Development and Evolution.....	182
<i>Roger Dence & Dr. Richard Mobbs, University of Leicester, UK</i>	
Delivering Cultural Heritage to Different Audiences: The JISC Digitisation Programme.....	183
<i>Alastair Dunning, JISC, UK</i>	
Outsourcing Blackboard: Before and Beyond.....	184
<i>Dr. Marc Dupuis, Leiden University, The Netherlands</i>	
The Past, the Present and Beyond Web 2.0 - 7 Stories in 75 Minutes!.....	185
<i>Brian Durrant, London Grid for Learning Trust, UK; Roger Larsen, Harald Gjervik, Nils Olav Sundsteigen, Dag Torp & Ingun Vaglid, Fronter, Norway; Tore Rydgren, Hedmark University College, Norway</i>	
Open Learning Objects and Learning Object Management Systems.....	186
<i>Giovanni Fulantelli, Davide Taibi, Manuel Gentile & Mario Allegra, Italian National Research Council, Italy</i>	
The EdReNe Network: How Repositories Bridge the Gap Between Resource Providers and Users.....	189
<i>Leo Højsholt-Poulsen, UNI-C, Denmark</i>	
Opening Up Education.....	189
<i>Dr. Vijay M.S. Kumar, MIT, USA; Dr. Toru Iiyoshi, The Carnegie Foundation for the Advancement of Teaching, USA & Dr. Stuart D. Lee, University of Oxford, UK</i>	
SALDO: A Practical Model for Developing CSCL, with Examples, Problems and Solutions.....	192
<i>Gert-Jan Los, VU University Amsterdam & Annemieke Hondius, INHOLLAND University, The Netherlands</i>	
Repositories and Communities at Cross-Purposes: Issues in Sharing Digital Resources.....	193
<i>Dr. Anoush Margaryan, Glasgow Caledonian University, UK</i>	
Cross-Domain Content: Integrating Access to Museum, Library, Archive and Audio-Visual Collections.....	196
<i>Jon Purday, European Digital Library network project, The Netherlands</i>	
Training of ICT Basis in WebCT Environment.....	197
<i>Vlasta Rabe & Vladimír Jehlicka, University of Hradec Kralove, Czech Republic</i>	
Teaching English Affectively in Second Life.....	200
<i>David Richardson, Höskolan i Kalmar, Sweden</i>	

Using On-Line Tools for E-Learning in Romania.....	201
<i>Prof. Nicolae Robu, Diana Andone & Prof. Radu VasIU, 'Politehnica' University of Timisoara, Romania</i>	
Designing and Sharing Quality Learning Objects in Online Social Networks.....	204
<i>Ruth Rominger, Monterey Institute for Technology and Education, USA</i>	
Design and Ongoing Monitoring Systems for Online Education.....	205
<i>Prof. Pier Giuseppe Rossi, University of Macerata, Italy</i>	
The Sigma Solution: Redefining Learner Accountability and Assessment in Online Learning Environments.....	208
<i>Duane Sider, Rosetta Stone, Inc., USA</i>	
Personalised E-Learning: Platform Users in Control of Content Selection and Its Delivery.....	211
<i>Radka Strnadová & Damian Miller, Institute of Education, University of Zurich, Switzerland; Maggi Lussi Bell & Karin Kovar, Zurich University of Applied Sciences, Switzerland; Jiri Danecek, Czech Technical University in Prague, Czech Republic</i>	
'Anne-Maries Welt' an Interactive Programme for German as a Foreign Language.....	212
<i>Karin Vavatzanidis & Enrico Karanikolas, NAVS Interactive, Greece</i>	
Developing European Online Courses.....	214
<i>Dr. Jana Vejvodová, University of West Bohemia, Czech Republic</i>	
Sharing the LOAD: The Future of Learning Object Designs?.....	217
<i>Dr. Richard Windle, Heather Wharrad, RLO-CETL, University of Nottingham; Dawn Leeder & Raquel Morales, RLO-CETL, University of Cambridge, UK</i>	
A True Story about LMS Migration from the Commercial Blackboard Environment to OSS Moodle.....	221
<i>Andreas Wittke, oncampus, Lübeck University of Applied Sciences, Germany</i>	

Games and Simulations in Support of Learning

Engaging and Preparing Learners for Employment Through Games Technology.....	225
<i>Sara Bingham, Ufi/learnDirect & Graeme Duncan, Caspian Learning, UK</i>	
One Case of a Computer Based Business Simulation: Virtual Reality?.....	227
<i>Prof. Tienie Crous & Jenny Ferreira, University of the Free State, South Africa</i>	
How to Create Compelling, Educationally-Sound Social Simulations.....	230
<i>Dr. David Guralnick, Kaleidoscope Learning, USA</i>	
The Easier, Faster, Better Track to Organisational Learning - New Serious Gaming Formats.....	231
<i>Sebastian Hoffmann, SNTL Publishing GmbH & Co KG, Germany</i>	

Making Your Own Serious Game: The EMERGO Approach for Integrated, Scenario-Based Game Design.....	232
<i>Dr. Hans Hummel, Open University of the Netherlands, The Netherlands</i>	
Motivate and Energise E-Learners with Immersive Simulations and Rivating Games Using Rapid Interactivity.....	233
<i>Nachiket Khare, Harbinger Knowledge Products, India</i>	
Training Social Skills Digitally - The Limits and Potential of Simulations.....	234
<i>Nathan Kracklauer, Enspire Learning, USA</i>	
Harnessing the Power of Electronic Learning Simulations to Shorten Training Cycles and Improve Employee Productivity.....	235
<i>Horst Krieger, ipcenter.at, Austria</i>	
Is the Corporate Sector Taking Serious Games Seriously?.....	238
<i>Euan Mackenzie, 3MRT Ltd., UK</i>	
Learn by S(t)imulation: A Generic Simulation Tool for Technical Workers in the Processing Industry.....	240
<i>Davor Meersman, Synergetics NV & Dagwin Roelants, Lanxess NV, Belgium</i>	
An Online Role Play Game to Identify, Develop and Retain the Business Critical Talents of Tomorrow.....	241
<i>Sara Protopapa, IBM, Italy</i>	
Can Bank Managers Play? Fortis Bank's Coaching Game.....	243
<i>Mathy Vanbuel, Marie Bijmens, Sally Reynolds, ATiT, Belgium</i>	
Enabling Teachers in Higher Education to Develop Their Own Simulations: The Virtual City of Cyberdam.....	247
<i>Pieter van der Hijden, Foundation LawOnline (Stichting RechtenOnline) & Sofos Consultancy, The Netherlands</i>	
Didactic Meta-Designs in Digital Game Based Learning.....	250
<i>Prof. Michael G. Wagner, Danube University Krems, Austria</i>	

M-Learning: Learning in the Hands of the Learner

Mobile Learning with Open Source: Experiences of a Widespread Implementation in Department Stores.....	254
<i>Dr. Jens Breuer, Qualitus GmbH, Germany</i>	
Large-Scale Content and Support for the Mobile Generation via Bluetooth.....	255
<i>Dr. Christopher Dennett & John Traxler, University of Wolverhampton, UK</i>	
Engaging with Mobile Technologies for Learning and Assessment.....	257
<i>Gareth Frith, Assessment & Learning in Practice Settings (ALPS) & Tom Holland, MyKnowledgeMap, UK</i>	

M-Learning - How Mobile Learning Technologies Enable Business Process Improvements.....	259
<i>Dr. Frank Habermann, IMC AG, Germany</i>	
Mobile Learning in Higher Education: The CorvinusCase.....	260
<i>Gábor Kismihók, Corvinus University of Budapest, Hungary</i>	
Devices and Desires: Opportunities, Barriers and Solutions for Flash-Enabled M-Learning.....	261
<i>Dawn Leeder, RLO-CETL, University of Cambridge, UK; Ellen Wagner, Adobe Systems Inc., USA & John Cook, RLO-CETL, London Metropolitan University, UK</i>	
eTaitava - Mobile Feedback for Out-of-Classroom Learning.....	265
<i>Pekka Pirttiaho & Dr. Jan-Markus Holm, Mobiletools International Oy Ltd., Finland</i>	
M-Learning and Podcasting as an Assistive Technology.....	266
<i>Dr. Mark Riordan, Institute of Art, Design and Technology, Ireland</i>	
Mobile Learning, Mobile Technologies, Mobile Societies, Mobile Knowledge.....	269
<i>John Traxler, University of Wolverhampton, UK</i>	

Web 2.0 linked to Education 2.0

The IBM Knowledge Factory: Example of a Global, Efficient and Industrialised Approach to Content Creation.....	272
<i>Bert De Coutere, IBM, Belgium</i>	
Unlock the Beta.....	272
<i>Johannes De Gruyter & Kamakshi Rajagopal, AVNet, K.U.Leuven; Helena Bijmens, EuroPACE ivzw, Belgium</i>	
Web 2.0: Personalised Learning in a Dynamic Multi-Mode Learning Environment to Support Group Based Assessment.....	274
<i>Martina A. Doolan, University of Hertfordshire, UK</i>	
The Impact of Virtualisation and Web 2.0 Services on Software Engineering Didactics.....	277
<i>Prof. Stefan Edlich, TFH Berlin - University of Applied Sciences, Germany</i>	
E-Learning 2.0 - A Stepping Stone to E-Learning 3.0?.....	278
<i>Anne E. M. Fox, CV2, Denmark</i>	
Wikis in Education: Public, Semi-Public or Private, Which Is Best?.....	279
<i>Sarah Guth, University of Padua, Italy</i>	
'Desperate Tutors'- Collaboration and Learning with Open Source Tools Between International Tutors.....	281
<i>Julia Jäger, common sense - eLearning & training consultants GmbH, Austria</i>	

How Social Networking Impacts Learning and Performance by Making the 'Invisible, Visible' - A Case Study.....	283
<i>Dr. Ray Jimenez, Vignettes for Training, Inc., USA</i>	
How Social Networks like 'sekretaria.de' Can Support Competence Development and Competence Management.....	287
<i>Anja Johanning, MMB-Institute for Media and Competence Research, Germany</i>	
Labyrinths of Learning: Wikis in Education.....	288
<i>Harrie Manders, Fontys University of Applied Sciences, The Netherlands</i>	
Using Podcasts to Support Student Learning in GEES Subjects.....	289
<i>Dr. Ming Nie & Dr. Palitha Edirisingha, University of Leicester, UK</i>	
Social Networks and Virtual Team Learning in WEB 2.0.	292
<i>Bart Rienties & Wim Gijssels, University Maastricht, The Netherlands</i>	
Radioweb Europe: A Multimedia Podcasting and RSS Experience in Europe.....	293
<i>Gonzalo Santamaria, CECE, Spain</i>	
What Happens If You Give a GPS and a PDA to a 'Grandpa'?.....	294
<i>Marta Serra, Manresa City Council, Spain</i>	
Learning with Closed Eyes - Application and Potential of Podcasts in Distance Learning.....	297
<i>Harald Stürmer, SGD (Klett Group), Germany</i>	
Virtual Worlds for Learning and Training.....	300
<i>Dr. Eilif Trondsen, SRIC-BI, USA</i>	
Building Learning Capabilities Globally Through Online Learning.....	301
<i>Dr. Nick H.M. van Dam, Deloitte Touche Tohmatsu, The Netherlands</i>	
The ePrep CoP: Birth and Development of a CoP Inspired and Supported by PALETTE.....	303
<i>Nathalie Van de Wiele, ePrep, France</i>	
No Life in Second Life?.....	305
<i>Dr. Steven Warburton, King's College London, School of Law, UK</i>	
Wiki Welten - An Instrument for Corporate Knowledge Sharing and Ubiquitous Learning.....	306
<i>Paul Westeneng, Andriessen en Partners BV, The Netherlands</i>	
Closing the Participation Gap - User Generated Content in E-Learning.....	310
<i>Prof. Karsten D. Wolf, University of Bremen, Germany</i>	

Video in Support of Online Learning

- Facilitating the Transmission of Know-How: Using Mixed Media to Teach Musical Instruments.....311**
Dr. Noël Conruyt & Olivier Sébastien, University of Reunion, France
- Vodcasting in Education 2.0.....314**
Inge de Waard, Carlos Kiyan, Lut Lynen, Maxime Madder, Verena Renggli & Maria Zolfo, Institute of Tropical Medicine Antwerp (ITM), Belgium
- Mobile Learning with the Teleteaching Anywhere Solution Kit (tele-TASK).....319**
Andreas Groß, Hasso-Plattner-Institute for Software Systems Engineering Potsdam, Germany
- Understanding Audiovisual Theory and Practice Applied to E-Learning Design: Case Studies in Singapore.....319**
Dr. Joe Peters, National University of Singapore, Singapore
- Organising Virtual European Seminars: Experience and Best Practice from the VENUS Project.....321**
Bieke Schreurs, EuroPACE ivzw, Sally Reynolds, ATiT, Kamakshi Rajagopal, AVNet, Belgium & Anna-Kaarina Kairamo, TKK, Finland
- Experiences with High Quality Video Services in Teaching, Learning and Skills Upgrading.....323**
Dr. John B. Stav, Sør-Trøndelag University College & Erik Engh, Quality Management Software, Norway
- Visual Archives in Education & Research: The Shoah Visual History Archive.....327**
Dr. Doris Tausendfreund, CeDiS, Free University Berlin, Germany
- Video Genres: Practice and Potential in Online Teaching and Learning...329**
Dr. Nicholas Watson, The Open University, UK
- From Blended to Mobile Learning - Experiences with Video-Streaming and Vodcasting.....330**
Benjamin Wilding & Beat Affolter, Swiss Banking Institute, University of Zurich, Switzerland
- The MEDEA Awards: Recognising Excellence in the Use of Digital Video and Audio in Learning.....332**
Dr. Clive P.L. Young, University of St. Andrews, UK

Quality and E-Learning

- EFMD CEL Programme Accreditation for Technology-Enhanced Learning - Lessons Learned from Accredited Programmes.....334**
Taiga Brahm, Sabine Seufert & Ulrich Bernath, Swiss Centre for Innovations in Learning (SCIL), University of St. Gallen, Switzerland

Essential Elements to Assuring Student Success.....	336
<i>Prof. John F. Ebersole, Excelsior College, USA</i>	
Quality for E-Learning in European Universities: The Challenge of Innovation.....	339
<i>Prof. Ulf-Daniel Ehlers, European Foundation for Quality in eLearning (EFQUEL), Belgium</i>	
Setting Standards: E-Learning Quality Management Using LCMS-Technology.....	343
<i>Stefan Heil, Eedo Knowledgeware, Germany</i>	
Walking the Tightrope: Balancing the Imperatives of Quality, Equity and Accessibility in a Transforming Higher Education Context.....	346
<i>Liesel Massyn, Karen Thomas, Prof. M.J. Crous, M. Fourie, H. van Zyl & H.E. Thomas, University of the Free State, South Africa</i>	
A Specific Quality Standard for Distance Learning? Advantages and Challenges of PAS 1037 for DL-Providers.....	349
<i>Dr. Okke Schlüter, SGD (Klett Group), Germany</i>	

Assessment and Evaluation

Advanced Testing Using Online Quizzes in WebCT.....	350
<i>Karmela Aleksic-Maslac, Duro Njavro & Pasko Anic-Antic, Zagreb School of Economics and Management, Croatia</i>	
Feedback in Exercise Assistants.....	353
<i>Prof. Johan Jeuring, Open University of the Netherlands, The Netherlands</i>	
Online Language Testing - Conciliating Efficiency with Validity.....	355
<i>Roger Charles Randall, MONDIALE Testsysteme, Germany</i>	
Online Assessment and Digital Rights Management.....	358
<i>Donald Staal, Wolters-Noordhoff bv, The Netherlands</i>	
eBay Europe Expands E-Learning with New Assessments.....	358
<i>Caroline Winning, eBay International AG, Germany</i>	

Online Learning, Equality and Accessibility

Online Learning: The Gateway for Greater Inclusivity for All Ages, Abilities and Access Resources.....	362
<i>Dr. Bob Barrett, American Public University, USA</i>	
E-Learning for All - Accessible Distance Learning Solutions.....	363
<i>Rogério Costa & Josélia Neves, Polytechnic Institute of Leiria, Portugal</i>	
E-Learning for Basic Skills - A Case for E-Learning that is Anything but Basic.....	364
<i>Ignatz Heinz & Ralf Kellershohn, Avallain AG, Switzerland</i>	

Accessibility in E-Learning for Visually Impaired Learners - Actual Problems and Solutions.....	368
<i>Jürgen Hüllen, Vocational Training Center for Blind and Visually Impaired People, Germany</i>	
E-Inclusion - Connecting Hospitals and Classrooms.....	371
<i>Prof. Anton Knierzinger & Caroline Weigner, Education Highway Innovation Center for School and New Technology, Austria</i>	
Optimising Online Content Production: Embedding Accessibility Practices in the Development Process.....	374
<i>Matthew Pointon, Northumbria University, UK</i>	
4 Tips for Integrating Web Accessibility Standards into Curricula.....	374
<i>Cousett K. Ruelas, St. Edward's University, USA</i>

E-Learning and Knowledge Management: How to Reconcile Coherence and Variety of Solutions, Efficiency and Reactivity?

Eric de Dreuzy, Director eLearning, Air France, France

To support employee skills development and Company projects, Air France provided more than 2.5 million training hours and spent almost 200 million Euros on training in 2006. The AF training plan must include 50% part of mandatory training.

A number of important issues explain the high levels of annual investment (8,7 % of total wages devoted to training) to maintain the qualifications required by the competition in all transport sectors: for example, flight safety, aircraft fleet development, IT evolutions, as well as internal changes in organization.

The Air France-KLM Group was created in 2004 and has more than 103,000 employees throughout the world. The Group is the world leader in terms of international passenger traffic. Its priority is to draw on existing synergies between Air France and KLM. This leads to important training efforts.

Like most leading airlines, Air France implemented new technologies in training early on to ensure maximum efficiency and reduce costs. Historically, the introduction of distance learning was started by the massive worldwide deployments and upgrades of new IT applications. A very simple question then arose: how do you simultaneously train thousands of people, not only in France, but in 180 destinations throughout the world, prior to implementations. The Learning Management System has been used as a change management tool, and provides an effective method for tracking of learning during ramp-up prior to software roll-out.

In addition to these "top-down" actions, new training opportunities were offered to employees through self-training formulas, and they were successful very quickly. The benefits most valued were the "just-in-time", the "just-enough" training, as well as the assistance of a dedicated team of local or distance tutors. Among the key factors, which have won the support of employees was the capability to enable diagnosis of needs, and adaptive delivery of tailored contents.

Since that period, starting in the late 90s, e-learning was mostly limited to the IT field for a long time, before becoming mainstream in all sectors of the business today. The reasons for this slower than expected growth are found in the feedback of most of large French corporations: the technological limitations are still important (bandwidth, complexity, sometimes the gap between the tool provided by the market and needs), but the most important are cultural: new reflexes to acquire, rigidities due to legal issues, lack of management involvement, and so on.

Today, dozens of e-learning projects are currently under development in all Air France divisions: commercial, inflight and ground services, engineering and maintenance, flight academy, HR and finance, IT, etc.

New issues are emerging, whose common feature is, through a corporate organization, to integrate e-learning and knowledge management into business processes.

For leading companies, the main challenge might be the ability to build and bring to life a learning and knowledge acquisition system reconciling five requirements:

- 1) Highly flexible solutions to adapt to a wide variety of needs. The context of working and learning for a pilot, an engineer, an airport employee, or an executive are very different. The diversity comes too from the geographical separation of learners in the world: culture, learning habits, HR status... Also there are different behaviors according to age, depending on whether they are "next-gen" or "silver employees"... Fortunately, using a LCMS offers some solutions: the identification of the learner's

E-Learning in the Corporate and Company Context

Meeting the Needs, A Company is Preparing for Virtual Teamwork

Dr. Marion Bruhn-Suhr, University of Hamburg, Germany

Summary

A fast growing company in the pharmacy sector with a couple of new subsidiary companies is in need for the efficient use of an in-house platform. In co-operation with the central institution for university continuing education of Hamburg University (Arbeitsstelle für wissenschaftliche Weiterbildung - AWW) a three and a half weeks course to train the employees was designed. The outcomes are discussed and results conclusions of the first presentation of the course are given followed by a series of recommendations for follow-up projects.

Introduction

A fast growing company in the pharmacy sector with a couple of new subsidiary companies had introduced an intranet platform to provide the necessary facilities for working in virtual teams. They had been using email and face to face meetings widely for their communications as long as there was only one location. The situation of a joint filing system was not satisfactory and became even more difficult with external subsidiaries not only because of security issues.

The management had observed that hardly anybody used the platform and teamwork was only realised among those who had known each other before and then mostly face to face. There were complaints about poor contributions by the new colleagues from the subsidiaries

In this situation the centre for continuing university education and distance learning of Hamburg University (AWW) was asked to develop and run an e-learning course on virtual teamwork on the in-house platform.

The course "Virtual Teamwork"

The course concept was based on one of the modules in the blended learning programme OLIM (Online Learning in Management), a professional management programme for postgraduates. It was adapted to the specific needs of the company given the following agreed learning targets:

Participants should

- recognise the value added of (virtual) teamwork in connection with processes of development, agreements and decisions.
- experience that working in virtual teams is possible and can be advantageous in comparison with face to face collaboration
- learn to use their platform as a tool to put virtual teamwork into practice
- can sensibly use the communication tools like email and forum discussions via their platform
- learn basic needs and concepts for a joint filing-system for their e-documents
- learn about do's and don'ts of successful virtual teamwork and e-communication
- learn how to recognise upcoming difficulties and how to meet these challenges

The overall workload for participants was calculated to be 15-20 hours.

Rethinking University Learning Environments and Methods

*Prof. Bodil Ask, University of Agder, UiA & Harald Haugen, Stord/Haugesund University
College, Norway*

New situation

Well established universities around the world have their traditions and ideals, aiming for academic reputation and research based education. Lectures, textbooks, demonstrations and group sessions have always been core essentials of the learning environment. During the last decades there have been growing demands for higher education to perform more complex work and manage everyday situations. Industry, businesses and public administration demand higher knowledge and skills for their employees. Some decades ago professional skills and knowledge were assumed to last for a lifetime with only minor updating and renewal. Today the changes in society, new professions, new technologies etc, require new skills - in short, there is a huge demand for lifelong learning, and it is expected that universities can change or convert their studies to meet these expectations.

In this situation the universities have difficulties in coping with growing student masses and rapidly changing curricula and new content demands. Campus facilities are not made to cater for the large student masses - and perhaps most important: Lifelong students can not remain campus students all the time; they have work, families and other commitments to meet, thus more flexible arrangements are needed.

Recognition of competence

The labour markets as well as the student society are developing towards globalisation. Enterprises and institutions frequently employ workforce from other countries, and students are roaming between institutions and across borders. Exams, credits, certificates and competences are not always recognised abroad. The Bologna Declaration outlines a process to create a European Higher Education Area, EHEA, by 2010. An overall goal here is the recognition of competence through a common academic system, including a credit transfer system (ECTS) and an accepted quality assurance system. This will facilitate mobility of both students and workforce, and also ensure transparency and level of skills and qualifications.

Modernising learning environments

ICT is assumed to have a high potential in educational settings. So far it has not quite met its expectation in higher education, despite political initiatives and large investments. Conservative academics, rigid organisations, laws, regulations and fear of losing control are all factors mentioned to explain the slow process of modernisation.

The online learning environment, based on ICT for communication between students, tutors and professors, turns out to be a major challenge to well established academic staff. Learning material that includes online lectures, videos, websites, printed material etc. seems scary, and at first sight, less personal. But this offers a flexible solution for students, particularly in lifelong learning settings. It may also be a more flexible situation for tutors and professors, not being bound to a particular location at fixed hours. But it often requires more structure, planning and development of material well in advance. Universities may benefit by offering net based and distant learning, especially where the number of students increases beyond campus capacities. The focus of investments may be shifted from new buildings and expansion of auditoriums to improved infrastructure, updating of key personnel and *time* for staff to develop and improve new learning environments.

Learning from the Future

Prof. Gilly Salmon, University of Leicester, UK

*"Imagination is the beginning of creation."
George Bernard Shaw*

*"The best way to predict the future is to invent it."
Alan C. Kay Fellow at Apple Computer Inc*

Why Learning Futures

In the early 21st Century, we have opportunities and responsibilities that no other educators have had before now. Within the complex changes occurring in Higher Education (HE) emerging from knowledge-technology-society transformations of the early 21st Century, we need to create viable and preferred futures for learning. In 1900, there were 500,000 students in HE worldwide. Now there are 100,000,000. Universities have become highly competitive and driven by technological possibilities. Learning technology is a way of reaching such vastly increased numbers without loss of quality.

Technology has become one of the most important features of the national and international economic, social and cultural landscape - and somewhat of a battlefield for beliefs, research and practical actions. Outcomes must now include commentary and modelling of the student learning experience, change in educational institutions and the future for learning and technologies.

The hype around e-learning, dominant at the turn of Millennium, resulted in many mistakes being made. Some were failures of investment in big consortia and huge project but there were many more small disappointments that happened quietly and painfully inside institutions. Now managers and teachers are desperately searching for structured ways forward that are affordable, worthwhile and impact directly on student learning. However, universities change slowly for a variety of historical reasons and mistakes cannot be easily rectified. New, effective and fast models of change are needed!

The physical environment of our universities includes the means to research, the archives of past learning and the presentation of new knowledge, the resources for learning and living, the people and the (for many) unparalleled and pervasive 'atmosphere' of scholarship. The first kinds of off-campus were field trips, clinical practice, gallery visits. However... 'online' is a learning environment too. The scope, depth and breadth of possibilities have grown exponentially over two decades. Millions of people experience electronic networked environments as communities and as libraries, each providing access to untold riches for knowledge generation and sharing. The online space is less organized or controlled compared to the physical academy. Time works differently. Interdisciplinarity is the norm not the exception. Contributions are scrutinized for their usefulness rather than the status of their author. Hierarchies are less obvious. The importance of personal identity (and the associated potential for discrimination) is more complex, often with different constructs in different contexts. Ownership is based less on monetary benefactors and more on commitment and knowledge. One way communications media such as radio and TV have been swamped by interactive and participative approaches - the creative, collaborative, communicate Web 2.0 take the stage! Web 3.0 is waiting in the wings. We have to put more effort into design for successful learning as a result.

It's difficult to get a holistic picture of our present... even harder to get a realistic or plausible vision of our future. Adoption of Web 2.0 technologies by learners in their everyday lives has already outstripped understanding of appropriate pedagogical and systems approaches in our universities.

Help Me! Online Learner Support Through the Self-Organised Allocation of Peer Tutors

Dr. Wim Westera & Leo Wagemans, Open University of the Netherlands, The Netherlands

The natural need for teacher support

This contribution is about a self-organised social networking mechanism to arrange instant online coaching by peers. The availability of instant support for learners who got stuck in their learning activities is an important determinant of study success. In online learning contexts, however, frequent one-to-one communication with students strongly raises the workloads of tutors and teachers. Through the internet connection students, indeed, expect instant support when they experience any problems with their learning tasks. Also, the diversity of the calls for help increases dramatically because of highly individualised learning routes and different paces of learning, which are advocated as the distinguishing features of online delivery. Contemporary constructivist pedagogies, which suggest complex, open learning tasks, seem to worsen things, because they require intensive, tailored tutoring rather than standardised support. Simply appointing more tutors would make online education unaffordable; limiting the amount of support would inevitably harm the quality and effectivity of online learning. In practice, online students cannot always be given the required support at the right volume and at the right time. While students may be working energetically on their study assignments and the associated learning materials, they may run up against a problem that needs to be solved first to be able to proceed. Naturally, students will try to figure it out themselves (which can be very informative as such), but after a while a remote teacher will be necessary to provide support in order to avoid pointless wasting of time. Indeed, the permanent availability of some service which preserves the effectivity of learning, is the essence of education.

Exploiting the (invisible) community of fellow-learners

The consultation of peers may be an interesting alternative. Even when online learning may incorporate some group work or communities of learners, the common notion of student cohorts is not necessarily preserved, which positions online learning as a quite solitary, individualised mode of learning: peer groups and peer consultation are not self-evident. Although a synchronised cohort of learners not always exists in online education, there may be many students working at the same domain or module, who are possibly not aware of each other and may not know each other. They may follow different learning routes, have different learning objectives and study at different paces and times. This invisible community of fellow learners, however, engage in the same subject matter and share the same interests and the same problems. It yields the social and intellectual force to provide peer tutoring as a powerful means to address the ever-growing need for support. Importantly, peer support is not just a sly trick of shifting the teachers' workloads to the students: indeed, various researchers report that peer tutoring often is found to produce higher learning outcomes (Fantuzzo 1989; Gyanani 1995; King 1998; Wong 2003) and to have positive effects on motivation, reflection, self-esteem and commitment (Fantuzzo 1989; Anderson 2000). By exploiting the (invisible) community in a convenient way, peer tutoring can be applied to preserve appropriate and affordable online tutoring services within a population of students. To this end, a self-organised peer-coaching mechanism has been developed to deal with individual calls for support by allocating the most appropriate fellow students for providing support.

The intelligent allocation of peers

We consider a population of students that are individually working on a number of domain tasks (learning modules, assignments, domain nodes or learning units) that make up the curriculum. It is assumed that individual learning routes and progress of students are logged by the system, that is, each time a student completes a learning module and starts with a new one the learner positioning data are updated. When a student of the population calls for support, the allocation mechanism uses the learner positioning data to select the most appropriate peer tutor

Enabling Teachers in Higher Education to Develop Their Own Simulations: The Virtual City of Cyberdam

Pieter van der Hijden, Foundation LawOnline (Stichting RechtenOnline) & Sofos Consultancy, The Netherlands

Welcome to Cyberdam

Welcome to Cyberdam, the Dutch virtual city with its history of 12 centuries, its old city centre, its variety of old and new neighbourhoods, its industrial area's, inland harbour and its surroundings with their interesting social and economic potentials. This city is populated with about one hundred firms, institutions, government agencies and households.

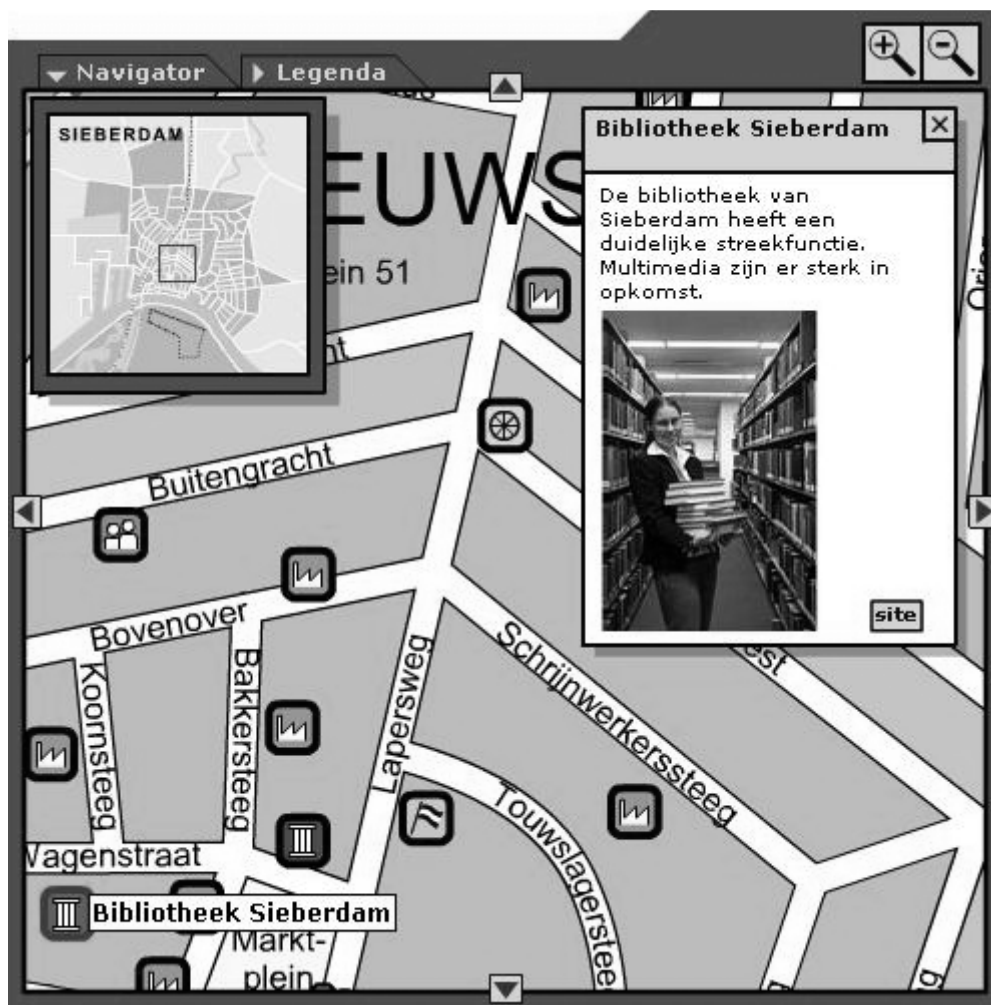

Figure 1: The interactive city map of Cyberdam.

Teachers and lecturers from different disciplines send their students to the virtual city of Cyberdam. There the roles of burgomaster, shopkeeper, nurse, lawyer, or one of the other inhabitants are allocated to them. They receive a briefing on the goal they have to reach, and then it's up to them to proceed. Via their Internet browser they have access to their "dashboard" where they can read their instructions and send and receive messages to and from other roles. These other roles are played by their peers, maybe by their teacher or even by an external expert. As the game session proceeds, the instructions may change. The game session
